Made up of ancient sediment and fine-grained rock, the structure was formed more than 800 million years ago by salt lakes. While not thought to be a corroboree site, this impressive structure is of great importance to the local Arrernte people and plays a significant role in their culture today.

This evening we head out into the East McDonnell ranges for a unique and authentic dining experience. The 'Original Outback Bush BBQ' dinner show is a fun filled evening of entertainment and outback cuisine, taking place around a large campfire under a star filled territory sky.
